Managed e-commerce department, which includes order fulfillment, order tracking, and also support Customer service and Handel Facebook and WhatsApp account.

CSE required to answer incoming calls from customers for various reasons- take orders, answer inquiries, resolve complaints and provide information.

#### Wordpress Frontend Developer

**InnovatorX Pvt Ltd**

**2021-2025**

I'm using both builder tools and custom development to create visually appealing and functional websites. This involves a combination of drag-and-drop page builders (such as Elementor) and custom coding using HTML, CSS, JavaScript, and PHP. Builder tools allow for rapid layout development and visual design, while custom coding provides the flexibility to implement unique design elements and advanced functionalities. PHP is used to manage server-side logic, interact with databases, and enhance dynamic content generation. By integrating PHP with front-end technologies, I ensure the website is not only responsive and user-friendly but also optimized for performance and scalability. This hybrid approach allows me to deliver dynamic, tailored websites that meet specific client needs with both efficiency and creativity.

## **Wordpress Developer**

**Stellixsoft Pvt Ltd- (Present)**

**1st march 2025**

I create visually appealing and functional websites using both drag-and-drop builders like Elementor and custom coding (HTML, CSS, JavaScript, PHP). This blend allows for fast development and highly tailored designs. With PHP, I can build dynamic features, handle server-side logic, and integrate with databases, ensuring responsive, user-friendly, and high-performance websites that meet unique client needs.
